

How do I upload an attachment to my application?

- Enter the Attachment tab
- Click the button Attachments
- Find the relevant document on your computer. You can only add documents saved in pdf format
- Name the file in blank and click OK
- Click the check mark next to the educational programme(s) you wish to attach it to. If there is no check mark next to the specific educational programme, the institution will not receive the attachment.

If you want to delete the attachment, click the red cross on the right side of the priorities.

Please note that the place of study can only see the documents marked with the check mark next to their number on the priority list.

Although you have signed an application, you can still upload attachments. Check the educational programme's website for deadline(s) for uploading attachments.
