

How do I change the order of priorities?

If you are applying for admission to more than one educational programme, you must prioritize your applications. The order of priority is important, as you can only be offered one study place.

You can view your current order of priority in your priority list in the tab 'Choice of education programme'. You can change the order of priority of your applications up until July 5th, 12 noon (CET), even though the deadline for applying is **March 15th before 12 noon (CET) for applicants with a non-Danish upper secondary education diploma.**

You can also change the order of priority of applications, that you have *not* signed:

- Click the arrows next to the numbers on the left to move the application up or down the list
- Check that the new priority is correct.

When you can see the change in the priority list, there is nothing else you need to do.

Please note

After July 5th, 12 noon (CET) you cannot change your priority order or delete applications. It is therefore important, that you check your priorities before July 5th, 12 noon (CET).
